

## STUDENT ACHIEVEMENT DATA

Each of the professional programs offered at UTHSC pursues the mission of the institution by producing caring, competent, and ethical patient-focused healthcare professionals prepared to detect, treat, and prevent human disease and injury. The expectation is that every student in each professional program will pass the professional licensure examination at or near completion of the program.

UTHSC measures student achievement in two primary ways: first-time pass rates on professional licensure exams, and graduation rates for graduate/professional programs and for undergraduate programs.

### FIRST-TIME BOARD PASS RATES

For each table below, the UTHSC row shows the first-time pass rate for each year shown; “N” is the number of UTHSC students who attempted the board exam; and “National” is the national first-time pass rate for that year.
