

THE UTHSC IMPACT

The University of Tennessee Health Science Center (UTHSC) was founded in 1911. Our vision is to be the preeminent public research and teaching university linking the people of Tennessee to the nation and the world.

UTHSC improves human health by fostering integrated, collaborative, and inclusive education, research, scientific discovery, clinical care, and public service. Offering a broad range of postgraduate and selected baccalaureate training opportunities, the main campus is located in the heart of the Memphis Medical District and includes six colleges - Dentistry, Graduate Health Sciences, Health Professions, Medicine, Nursing and Pharmacy. UTHSC educates and trains cohorts of medicine, pharmacy and health professions students - in addition to medical residents and fellows - at its campuses in Knoxville, Chattanooga, and Nashville. Patient care, professional education, and research also are carried out at more than 100 clinical and educational sites across Tennessee.

For additional information, please visit us at uthsc.edu.

The University of Tennessee is an EEO/AA/Title VI/Title IX/Section 504/ADA/ADEA/V institution in the provision of its education and employment programs and services.
